A. Canopy Assembly

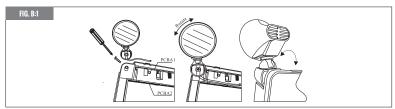

Insert canopy into housing at a 20 degree angle and twist. Quick snap is now locked firmly. CAUTION: Trying to remove the canopy while it is locked into place may cause damage.

B. Assembly Lamp Heads

- 1. Open front cover with flat head screwdriver.
- 2. Insert the lamp heads at the corners of the main frame. Select direction of lamp head before inserting.
- 3. Connect male connector on lamp head to female connector on PCBA.

C. Mounting Instruction

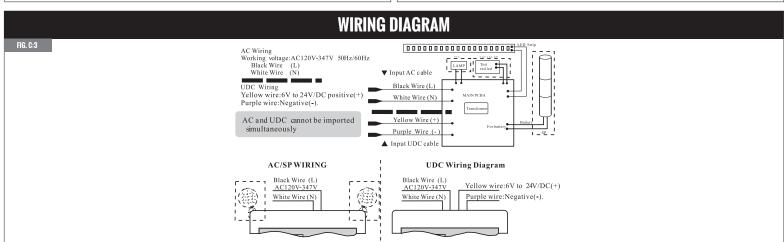

THE FIXTURE IS SUITABLE FOR WALL MOUNTING, SIDE MOUNTING AND CEILING MOUNTING

- 1. Open the front cover by flat screwdriver.(Fig.C:1).
- 2. Assemble the remote head if needed.
- 3. Knockout the appropriate mounting hole cover on the black plate.
- 4. Attach the crossbar to the junction box, set the longer blade of the crossbar touching the J-box
- 5. Route the proper wire through mounting hole out of the housing. Make the electrical connections inside J-box as the wiring diagram states. (Fig.C:3). Push the excess wire into J-Box, Mount the back plate on the wall. Attach battery connector to PCB, restore the front cover on the unit.

If the pictogram direction assembled is not suitable, you can change the direction of the pictogram or replace it into the diffuser easily. (Fig. C:2)

For the ceiling and side mounting purpose, knockout the mounting hole cover on side of top of unit, and assemble the canopy.

- 1. Attach the crossbar to the junction box, set the longer blade of the crossbar touching the J-box.
- 2. Route the proper wires through the mounting hole out of the housing.
- 3. Make the electrical connections inside the J-box as the wiring diagram states.(Fig. C:4)
- 4. Push the excess wire into the J-box, use the screws to tighten the canopy to the crossbar so that the canopy is securely fastened and tight against the wall.
